

WHY CHOOSE AN AMETEK MICROJAMMER BLOWER?

The AMETEK Microjammer family of brushless blowers lead the industry with their innovative design and advanced technology. Leveraging AMETEK's brushless motor designs, the blowers offer compact, low noise and long life solutions to fit your specific application needs.

Whether you need a standard blower for your application or a customized performance solution, AMETEK will exceed your expectations!

Many of our features and applications are listed below. If not, talk to your AMETEK sales representative who will work with our engineers to meet your application requirements.

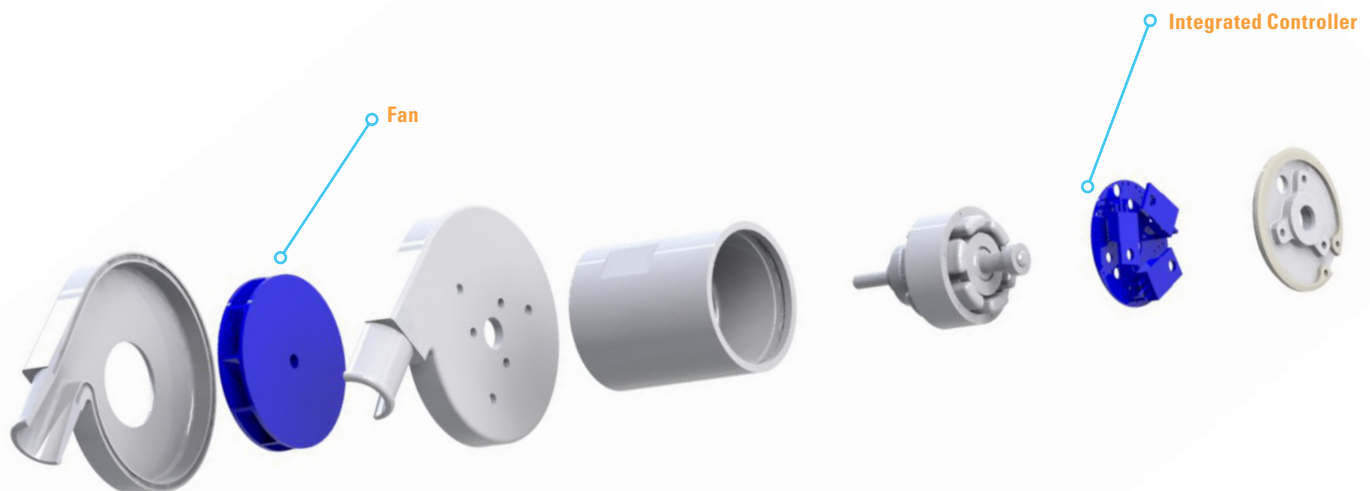

CUSTOMIZABLE FEATURES

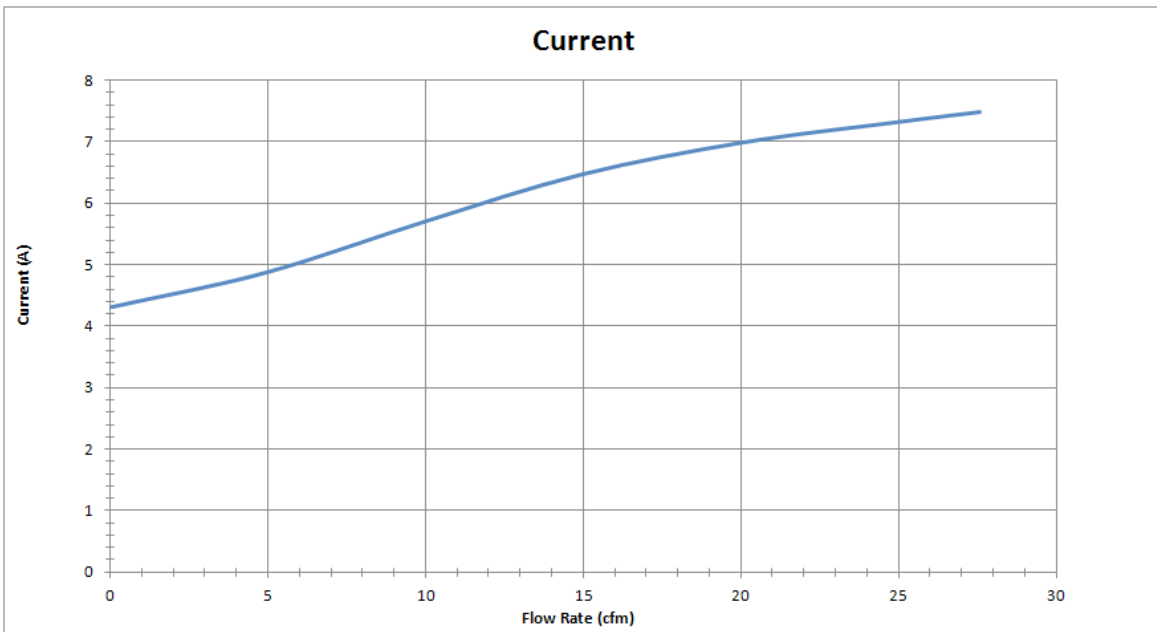

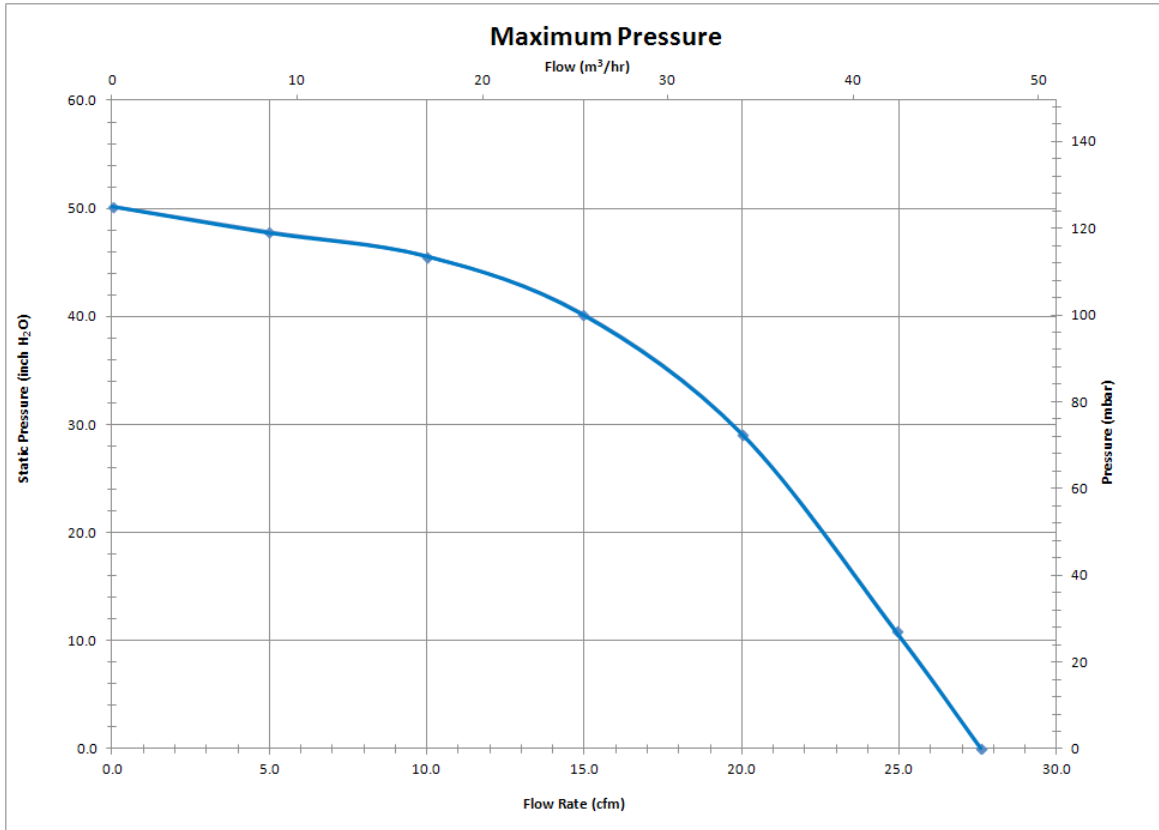

- Small compact size makes these blowers great for tight applications
- Integrated controller models for proven performance
- Non-integrated controller models to enable you to only have 1 set of controls for your application
- Long life and reliability for your application needs
- Pressures up to 50 in. water
- High performance blowers to match your application's needs
- Coated PCB for added protection in high moisture environments
- Muffler options to help reduce noise levels at high pressures
- Customizable wiring connectors to minimize electrical interface demands

APPLICATIONS

- Medical Sterilization
- Medical Air Beds
- Business Machines
- Chest Vests
- Pillow Packaging
- Race Helmet Ventilation
- Materials Handling
- Atomization
- Paper Separation
- Hold Down Applications
- Fuel Cell
- Cooling Applications
- UV Curing
- Air Sampling

MECHANICAL EXPANSION

PLEASE NOTE:

Any operating point that is on or under the maximum performance curve is attainable by AMETEK DFS. If you have a point that is above the curve, talk to your AMETEK sales representative to find the correct product and solution to fit your application.
