

AMETEK Electromechanical Group (EMG) ...

Is one of the world's largest producers of high-speed electric motor products for original equipment manufacturers (OEMs). In business since 1915, EMG uses its core competencies in motion and air movement products as engineered solutions for application-specific needs. A business unit of AMETEK EMG, Technical & Industrial Products offers Brushless DC motor, blower, and controller-based solutions.

The standard product lines of AMETEK Precision Motion Control cover a wide range of application demands. If there is a need for a product with unique performance, mounting, environment or agency requirements, AMETEK can supply the solution. Whether a customer needs a standard or a special design, AMETEK has the solution for your application. AMETEK offers economies of scale that only can be accomplished by a company that produces more than 26 million motor products per year. With multi-plant capability and flexibility, AMETEK is positioned to support our customers' global programs.

AMETEK Brushless DC Motors, Blowers, Fans, Pumps, and Controllers are an ideal choice for such varied applications as medical instruments, robotics, pumps, compressors, business equipment, fans, machine tools, tape drives, printing, fuel cells, textiles or any other precise rotary motion/air delivery applications.
